

Mission Statement

 As a leading Manufacturer of Precision Fine Wires, FEINDRAHTWERK ADOLF EDELHOFF GMBH & Co. KG are dedicated to providing optimum solutions for the Electronics, Photovoltaics and Lighting Industries.

 With the production and worldwide marketing of our products, we aim to be the leader in Wire Surface Treatment innovation, including special materials.

 Our aim is to achieve commercial success whilst having due regard to the environment and the welfare of our workforce.

 We continually try to reduce our consumption of raw materials, energy and water, and the corresponding environmental impact.
We are also committed to the minimisation of emissions, effluents, noise and industrial injuries.

 By strict compliance with the relevant Regulations, Statutory Requirements and Standards we constantly strive for enhanced quality of our products and services, as well as protection of the environment and our workforce.

 The maintenance of this policy is guaranteed by constant evaluation and corrective measures where applicable.

 Our management philosophy is to set targets, empower all employees to participate in decision-making, and monitoring performance.

 Through their involvement, knowledge and ideas, all employees contribute to constant improvements in our business.

 We attach great importance to continuous training of our employees who are motivated to operate in a constructive atmosphere.

 Our top priority is the attainment of Customer Satisfaction.
